EXTERIOR DESIGN | COLOUR CARD

BERGER
P A I N T S

Grand

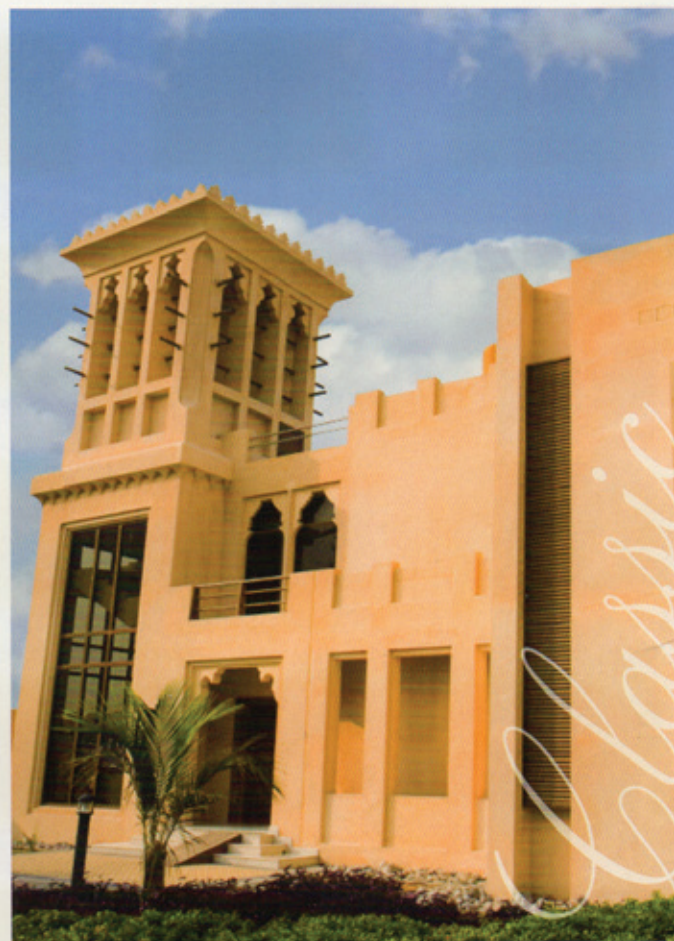

EXTERIOR DESIGN NOTE

The sophistication of the elegant building is created by its minimal approach to colour. Here the architecture does the talking and the smokey, shadow-like grey co-ordinates with the stonework on the garage. The stone effect of the exterior walls has been achieved with Weathercoat Stoneshield, and the colour matched to Berger Castellina (8754), creating a look of harmony. Berger Dark Moon (8325) on the front door creates a grand welcome and a fine line of Berger Savana Oaks (8468) around the inside of the window frame picks out the interesting shapes.

Classic

EXTERIOR DESIGN NOTE

This striking building shows the richness that beautiful detail brings. Here the colour scheme is restrained, the designer lets the structure speak for itself. Berger Citrus Sherbert (7968) is a rich, sand coloured shade that complements the opulence of the architecture. The mullions in the windows have been painted in a colour matched to the tinted glass Berger Soul of the Earth (8597), so strengthening the harmonious effect. It's an example of dignity in design and colour. The Al Turath Traditional Effect from the Weathercoat Vintage range gives the smoothest rendered look.

[weathercoat] FINISHES

The Berger Weathercoat textured finishes collection has the right render solution for any exterior specification.

[weathercoat] FLEX

Weathercoat Flex is a highly elastic coating that has been designed to stretch and bridge cracks up to 2.20mm. The anti-carbonation properties protect structures and enhance the life of buildings as do the high resistance to UV rays, algae, fungi and dirt pick-up. Available in finishes from smooth to medium texture.

[weathercoat] INSUFLEX

Weathercoat Insuflex reflects UV rays and so lowers interior temperatures and reduces cooling costs. The high tech formulation has been certified by Geoscience in the USA. Insuflex covers hairline cracks with a highly flexible, tough, durable film that is extremely water repellant.

[weathercoat] STONE SHIELD

Weathercoat Stone Shield gives buildings the marvellous look of natural stone but delivers greater durability than stone. This innovative coating incorporates synthetic stone in the formulation. It's cost effective and can be easily sprayed.

[weathercoat] VINTAGE

Weathercoat Vintage brings timeless, heritage finishes to modern buildings. The five unique, decorative patterns range from rugged and fortress inspired to understated and smooth all formulated specifically to protect from the Middle Eastern climate to give excellent exterior durability and colour retention.

[weathercoat] TEXTURE

Weathercoat Texture* is a premium range of five different profiles from heavy texture with marble chips to a smooth gloss look that can be applied to many surfaces. Texture covers minor undulations and hairline cracks on buildings and offers excellent exterior durability.

* Available in select countries only

All colours presented in this card are available in 'Weathercoat Pure Acrylic - Silk / Matt' smooth emulsion only and might not be available in other Weathercoat finishes. For requirement in other finishes for a specific colour, please contact Berger office or sales representative.

Fusion

EXTERIOR DESIGN NOTE

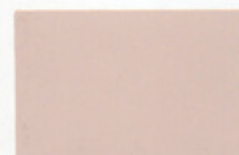

The clean lines of contemporary architecture are defined even more clearly with a pale colour. Berger Master Manuel (8762) has just the right amount of tint to make it practical and yet it's light enough to give an edgy effect. The shutters have been painted in Berger Bistro Brown (8645) to give a contrast and strong graphic pattern. Berger Weathercoat Flex will ensure that the building stays looking this good for years to come. The Berger Tex Fine has keylines marked to represent stone blocks.

Rustic

EXTERIOR DESIGN NOTE

The country inspired look is warm and inviting with layers of historically inspired decoration. The very essence of rustic can be achieved easily with the right exterior paint colour. The welcoming factor is created here with Berger Creased Khaki (7928) as the main wall colour; it's a sunny, charming shade. The entrance is accentuated with a feature shade, Berger Creamy Natural (8483). A dash of Berger Shady Side (8765) on the trim highlights the decorative doors and railings. Weathercoat Insuflex can be used to give the rustic wall finish it also keeps the interiors cooler by reflecting the sun's heat.

EXTERIOR DESIGN | COLOUR CARD

The shades on this colour card have been hand selected for you by our colour designers, delivering you an up to date and inspiring Exterior Design Collection. There are another 1100 colours available from your nearby Berger Paints Colourworld showroom.

All colours shown in this card are available in Weathercoat Pure Acrylic - Silk / Matt smooth emulsion only and might not be available in other Weathercoat finishes and textures. For specific colour requirement besides smooth emulsion, please consult the respective colour and finish cards of the Weathercoat finishes or consult your Berger sales representative / dealer or nearby Berger office.

Although the colours shown are reproduced as accurately as modern processes allow, the colour of the actual paint may vary slightly from the colours shown in this card.

[weathercoat]

PREMIUM EXTERIOR

The Berger Weathercoat range delivers comprehensive solutions for protecting and beautifying exteriors. This family of products offers the most up to date finishes and colours to enhance buildings and provide maximum protection. All Weathercoat products are the latest technology, highest quality and are environmentally friendly. See the other side of this card for an overview of the render products in the Weathercoat collection.

Berger's flagship exterior paint is Weathercoat Pure Acrylic - Silk / Matt, a premium coating that offers superior performance. Weathercoat is extremely durable and will withstand the toughest conditions that nature throws at it.

The 100% acrylic formulation ensures that Weathercoat will flex as temperatures change and so provide crack resistance. The paint is especially designed to cope with the sun's searing heat and UV rays. On the other hand, wet conditions do not challenge this resilient coating because of its superior adhesion. Weathercoat looks good for longer, is chalk resistant and will withstand dust pick-up and abrasion. It's also highly washable, an important advantage.

Weathercoat is water based so it is convenient to use, it has excellent hiding power and colour lasts longer. Excellence all around.
