TOTAL | EXTERIOR PROTECTION

Weathercoat | Total Exterior Protection

...say no to exterior problems

Weathercoat | Total Exterior Protection

The Weathercoat range of products from Berger Paints is a selection of luxury exterior finishes that stand for Total Exterior Protection. The range covers everything a consumer may need for exteriors; luxury smooth finishes, premium texture finishes that are also elastomeric and anti-carbonation coatings, luxury signature finishes, advanced temperature reduction coatings and premium acrylic spray coating among others.

Berger Paints have always been on the forefront of technology, introducing many world class products across the finish market.

Using their innovation, state of the art technology and thorough market research, Berger Paints have created this advanced exterior finish system, Weathercoat | Total Exterior Protection.

By far the most comprehensive exterior system to date, Weathercoat | Total Exterior Protection offers a range of premium, technically advanced finishes over multiple product categories, designed to work together or independently to create the complete exterior solution.

Weathercoat | Advantages

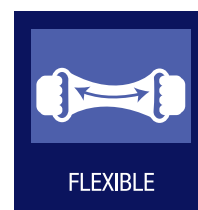

10+ Year Performance

Weathercoat products are extremely durable. Created using the latest technology, this range of finishes has a 10+ year film integrity span.

Temperature Guard

The Weathercoat range contains Temperature Guard, an advanced heat reflecting technology, keeping interiors cooler leading to savings on energy bills.

Flexible

Weathercoat range products are flexible with crack bridging properties, flexing with extremes in temperature keeping your walls crack free.

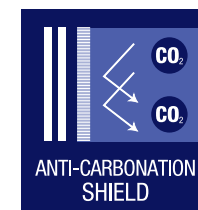

Anti-fade Formula

All Weathercoat products are formulated with advanced UV resistant pigments which protect your walls and prevent the colour from fading.

Dirt Repellent

Weathercoat contains advanced dirt repellent properties, so there is less dirt pick up keeping your walls looking clean and pristine for a longer period of time.

Anti-Carbonation

Weathercoat range of products offer anti-carbonation protection, a non-porous film which prevents carbon dioxide from entering the walls and causing corrosion.
